

Personal WhatsApp Assistant – BRD & Roadmap

1. Business Requirement Document (BRD)

Project: Personal WhatsApp Assistant – Reminder & Chatbot

Tujuan:

- Mengingat jadwal dan kegiatan pengguna
- Menjawab pertanyaan umum dan IT
- Dijalankan di laptop server

Stakeholder:

- Pengguna (personal use)
- Sistem WhatsApp Bot, Node.js Backend, AI Layer, Database

Fitur Wajib:

- WhatsApp Bot
- Reminder
- AI Q&A;
- Database
- Scheduler / Cron
- Modular Design

Fitur Opsional:

- Daily Summary
- Voice Note Support
- Attachment Handling

2. Roadmap Implementasi

Sprint 1: Setup Project & WhatsApp Bot

Sprint 2: Integrasi Gemini AI

Sprint 3: Reminder Sederhana

Sprint 4: PostgreSQL Database

Sprint 5: Scheduler & Cron

Sprint 6: Daily Summary

Sprint 7: Docker Deployment

Sprint 8: Enhancement & Optimization

3. Kebutuhan Instalasi

Software:

- Node.js
- Git
- Baileys
- PostgreSQL
- Redis (opsional)
- Docker & Docker Compose
- Gemini API

Hardware:

- Ryzen 3 3200U
- RAM 12 GB
- Storage minimal 50 GB kosong
- Internet stabil

4. Struktur Project

wa-assistant/

■■■ src/

■■■ database/

■■■ docker/

■■■ .env.example

■■■ docker-compose.yml

■■■ README.md

5. Kesimpulan

Mulai development di laptop utama menggunakan Baileys + Gemini API. Setelah fitur stabil, push ke GitHub lalu deploy ke laptop server menggunakan Docker.
